# SUSPENDED

## Rank 1 maximum-score walkthrough

A 70-cycle route to the best verified ending

VERIFIED FINISH

**RANK 1**

**8,000 casualties | rank 1 | 70 cycles**

69 commands | 249,718 instructions | 3 robot deaths

53 unique form/opcode/mnemonic rows

### How to play this route

Begin from a fresh Release 8 story with deterministic seed 1035. Enter the 69 commands in order; robot-specific commands can run while other robots continue moving. The route sets Weather Tower 2 to 100 before the third quake and finishes in 70 cycles.

Verified result: 8,000 current casualties, zero projected casualties during recovery, 30,164,000 possible survivors, rank 1 (best), and the winning reset ending. There is no numeric score global; verify the ending text. This improves on Task 19.6's no-robot-death result of 114,000 casualties and rank 3. Poet dies after sending the reset code; Waldo dies carrying the fourteen-inch cable, which Whiz retrieves and installs; Sensa dies after replacing the primary cable.

Key item chain: Sensa brings the ramp and cutter; Waldo takes the grasping extension, fixes Iris, fits the red and yellow ICs, and carries the fourteen-inch cable; Iris installs that cable and the fuse; Sensa frees Fred's twelve-inch cable and installs it in the Primary Channel; Poet carries the camera to read the sign. For seed 1035, the code is BARKLA: BAR is circle 4, KLA is circle 5. Other seeds produce a different code; use the printed halves-to-circles key.

All commands are one input apiece. The deterministic route halts immediately after the second reset circle is accepted. The full local instruction trace records the exact execution count and opcode inventory.

### Verified checkpoints

**8,000 casualties**
final score at the rank-1 ending

**Rank 1**
best of seven ending ranks

**0 projected**
casualties during recovery

Replay settings: fresh Release 8 story | deterministic seed 1035 | local route and trace

Three robots die; Whiz retrieves Waldo's cable after his death.

# DISPATCH AND FIRST REPAIRS

Commands 001-035; read down the left column, then down the right.

001 poet, go to weather control

002 sensa, go to sub supply room

003 whiz, go to secondary channel

004 sensa, take ramp

005 sensa, go west

006 sensa, take container and grasper

007 sensa, go to hallway junction

008 waldo, go to hallway junction

009 auda, go to gamma repair

010 poet, turn second dial to 100

011 poet, go to hallway end

012 iris, go to main supply room

013 sensa, put ramp at dropoff

014 auda, listen

015 waldo, take container and grasper

016 waldo, go to main supply room

017 waldo, install grasper

018 waldo, take red ic and yellow ic

019 sensa, go north

020 sensa, take ramp

021 sensa, go to small supply room

022 waldo, open panel

023 waldo, replace rough device with rough object

024 waldo, close panel

025 poet, get in car

026 poet, get out of car

027 poet, go to biology lab

028 waldo, take burned and fried chip

029 poet, take camera

030 sensa, put ramp at holder

031 sensa, get on ramp

032 sensa, take cutter

033 sensa, get off ramp

034 sensa, take ramp

035 sensa, go to sloping corridor

# FC CHANNELS, CABLES, AND FINAL RESET

Commands 036-069; read down the left column, then down the right.

036 poet, go to vehicle debarkation

037 waldo, put red ic in red socket

038 waldo, put yellow ic in yellow socket

039 poet, get in car

040 poet, get out of car

041 poet, go to primary channel

042 sensa, put ramp at dropoff

043 sensa, go to gamma repair

044 waldo, push button

045 iris, take fuse

046 waldo, take cable

047 waldo, go to the secondary channel

048 iris, go to middle supply room

049 iris, take cable

050 iris, go to main supply

051 sensa, examine object

052 sensa, turn flowswitch

053 both sensa and auda, move fred

054 sensa, cut cable with cutter

055 poet, plug tv1 in

056 poet, aim tv1 at sign

057 sensa, take cable

058 sensa, go to primary channel

059 iris, put cable in machine

060 iris, put fuse in machine

061 whiz, go to waldo

062 whiz, take fourteen-inch cable

063 whiz, replace the nine-inch cable with the fourteen-inch cable

064 whiz, drag waldo to the east end

065 auda, go to sleep chamber

066 wait

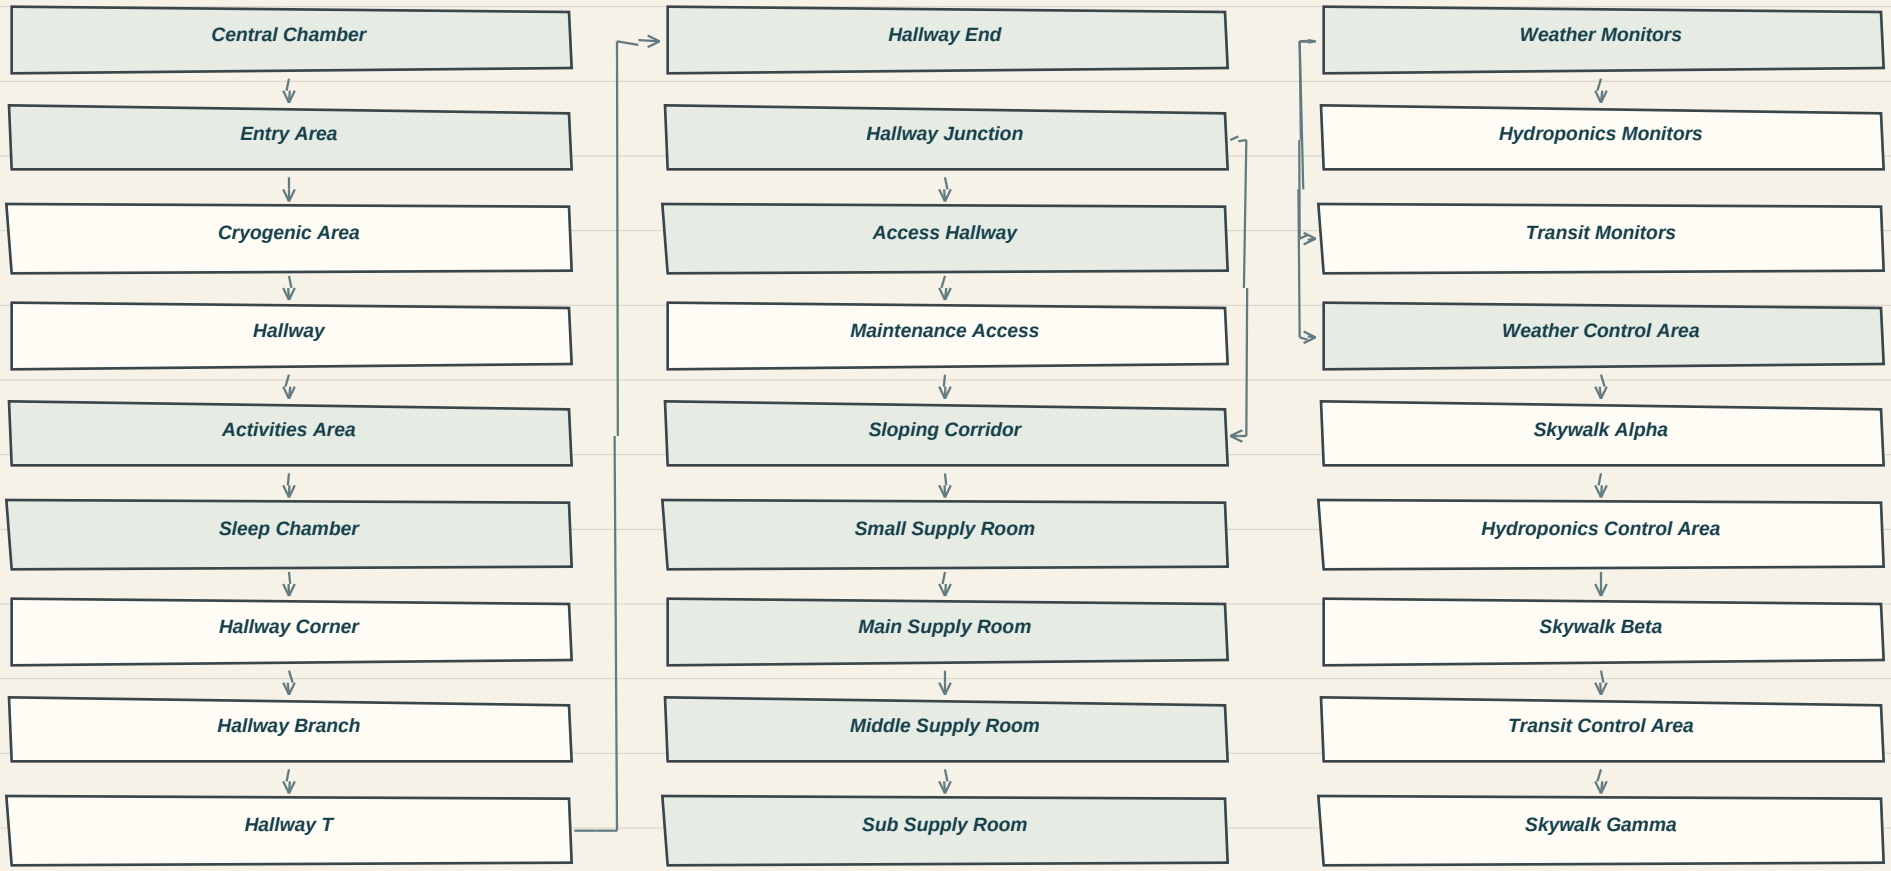
067 sensa, replace four-inch cable with twelve-inch cable

068 iris, press fourth circle

069 iris, press fifth circle

# Service, Controls & Habitation

Hand-sketched schematic of all 63 named room objects, not to scale. Green rooms were reached on this route.

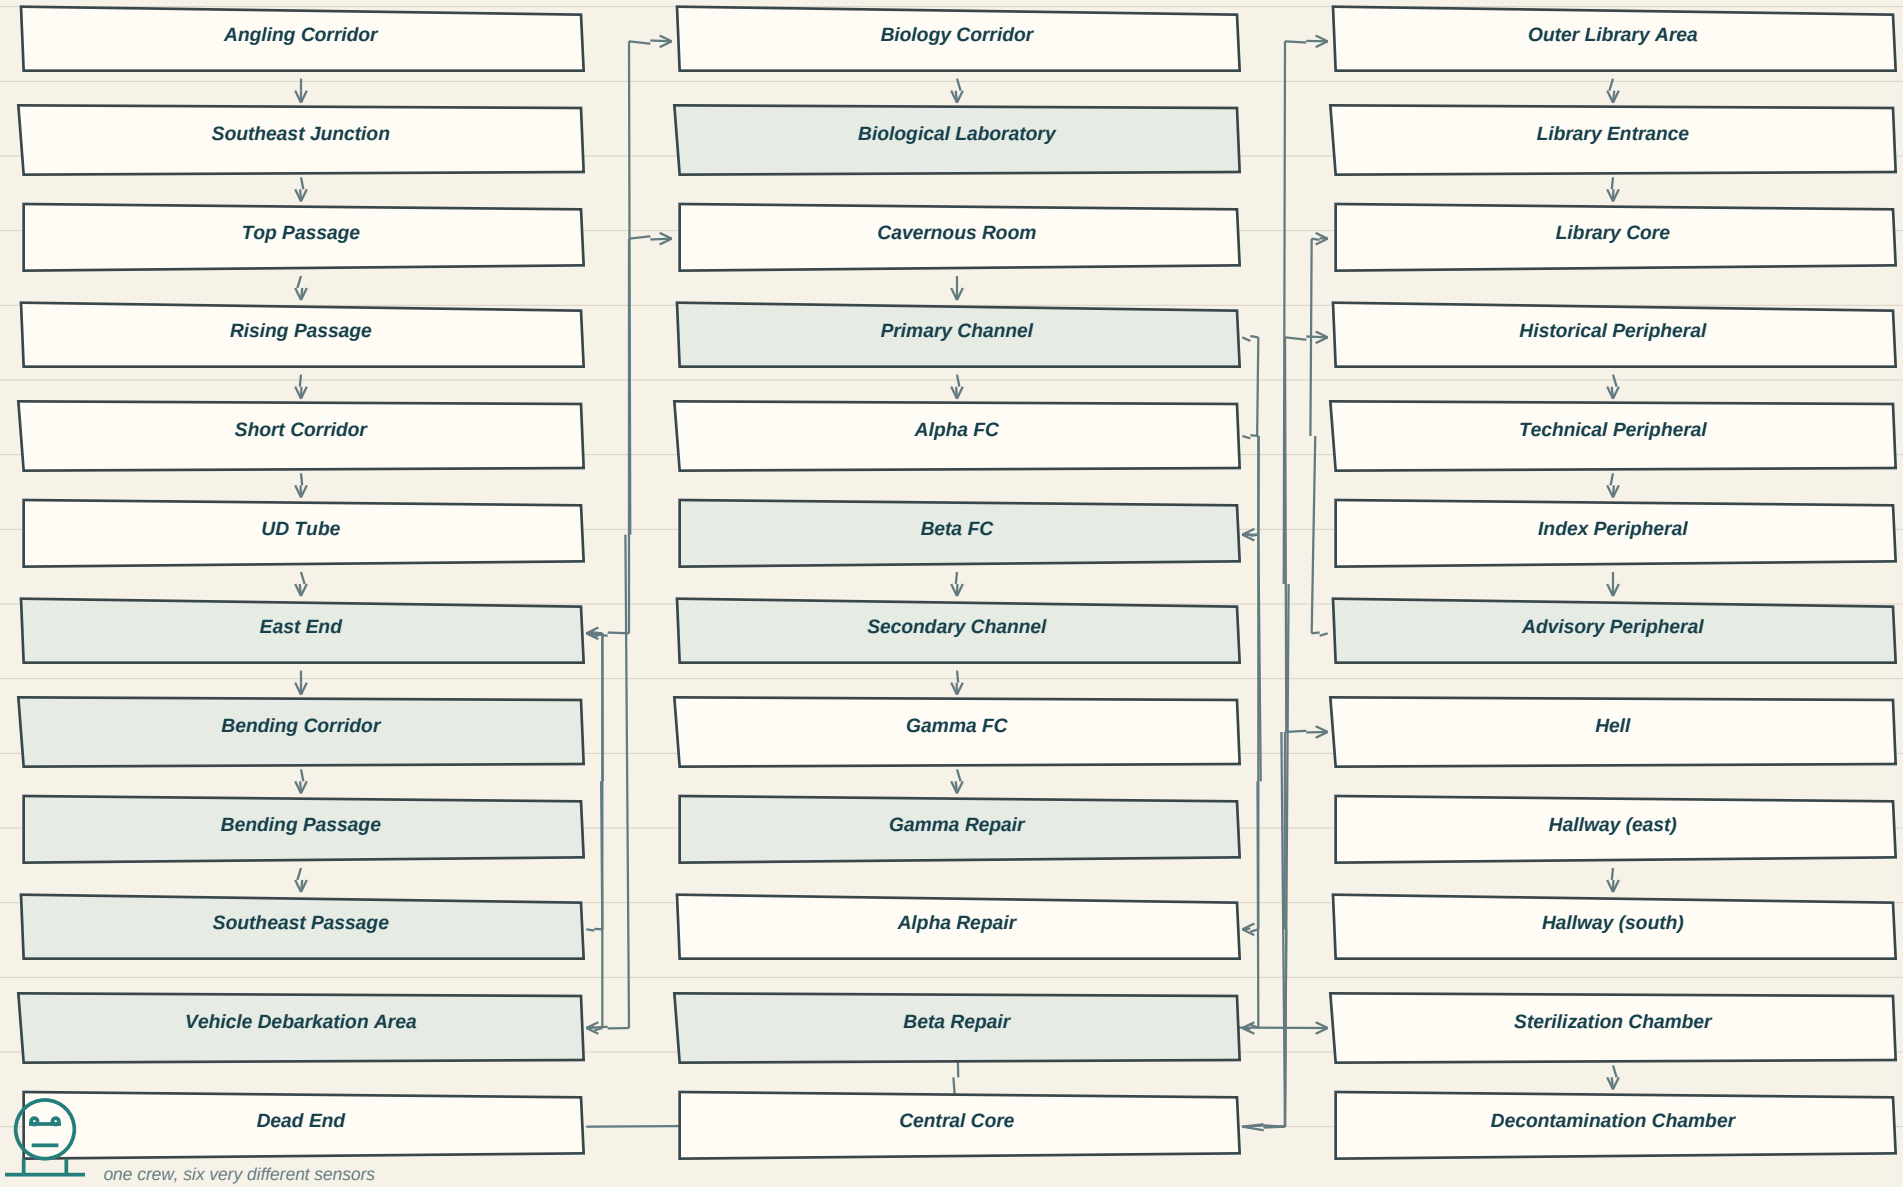


*the repaired FC cable run*

**ROUTE KEY** The room boxes and pencil arrows show the connected, not-to-scale corridor network.

# Passages, Library & Filtering Computers

Hand-sketched schematic of all 63 named room objects, not to scale. Green rooms were reached on this route.



**ROUTE KEY** The room boxes and pencil arrows show the connected, not-to-scale corridor network.

# Opcode table 1 of 3

Form, opcode, and mnemonic are grouped as executed; rows follow first appearance.

**53 unique form/opcode/mnemonic rows** **249,718 total instructions executed**

First Seq is one-based execution order; First PC is the first instruction address in hexadecimal.

| FORM | OPCODE | MNEMONIC | COUNT | FIRST SEQ | FIRST PC |
