SUSPENDED

No-death winning walkthrough

A deterministic route through the repairs and the final reset

VERIFIED FINISH

WIN

114,000 current casualties | rank 3 | 194 cycles

127 commands | 214,086 instructions | zero robot deaths

54 unique form/opcode/mnemonic rows

How to play this route

Begin with a fresh story and keep the deterministic replay seed at 1035. Type every numbered command exactly as shown; commands that name a robot change the active voice, so the Auda and Poet commands are explicit.

The route first corrects the planet-side controls, repairs Iris and the Main Supply machine, frees Fred, and replaces the damaged FC cables. Auda listens for the intruders, retrieves their bag, and shuts off the acid spray before Poet enters the Cavernous Room.

The story has no numeric score global. At command 17, SCORE reports 8,000 casualties after 25 cycles. The completed safe route ends at 114,000 current casualties, rank 3, and 29,888,000 possible survivors; the game prints that the Filtering Computers are back in balance and halts successfully.

Item checks: Waldo carries the extension and rough object to Iris; Iris installs the red and yellow ICs, takes the fuse and orange cable, then replaces the fuse; Waldo later carries the wedge, cutter, and red cable; Auda carries the tool bag; Poet carries the camera to the Primary Channel.

Verified checkpoints

8,000 casualties

25 cycles after surface controls

114,000 casualties

rank 3 at the winning ending

29,888,000 survivors

170,000 projected during recovery

Replay settings: fresh Release 8 story | deterministic seed 1035 | local route and trace

The route keeps Poet out of the acid-filled Cavernous Room until Auda reports the hiss has stopped.

SURFACE CONTROLS AND FIRST REPAIRS

Commands 001-044; read down the left column, then down the right.

001 poet, go to weather control
002 wait
003 wait
004 wait
005 wait
006 turn second dial to 100
007 poet, go to hydroponics control
008 wait
009 set first lever to 90
010 set second lever to 45
011 set third lever to 70
012 poet, go to transit control
013 wait
014 flip first switch
015 flip second switch
016 flip third switch
017 score
018 waldo, go to middle supply
019 wait
020 wait
021 wait
022 wait
023 get extension
024 wear extension
025 get rough object
026 north
027 east
028 open panel
029 replace rough device with rough object
030 close panel
031 iris, west
032 get burned and fried chips
033 drop burned and fried chips
034 south
035 get red ic
036 get yellow ic
037 north
038 put red ic in red socket
039 put yellow ic in yellow socket
040 press orange button
041 get fuse
042 get orange cable
043 put fuse in machine
044 sensa, go to gamma repair

ACCESS, CUTTER, AND ACID VALVE

Commands 045-088; read down the left column, then down the right.

045 waldo, south
046 get wedge
047 go to hallway junction
048 wait
049 wait
050 wait
051 wait
052 put wedge against step
053 north
054 get wedge
055 go to small supply
056 wait
057 wait
058 wait
059 drop wedge
060 stand on wedge
061 get cutting tool
062 get wedge
063 go to sloping corridor
064 wait
065 wait
066 put wedge against step
067 sensa, examine cage
068 flip flowswitch
069 waldo, go to gamma repair
070 wait
071 wait
072 wait
073 wait
074 poet, go to hallway end
075 auda, go to sleep chamber
076 wait
077 wait
078 wait
079 listen
080 wait
081 wait
082 wait
083 get bag
084 south
085 south
086 east
087 wait
088 wait

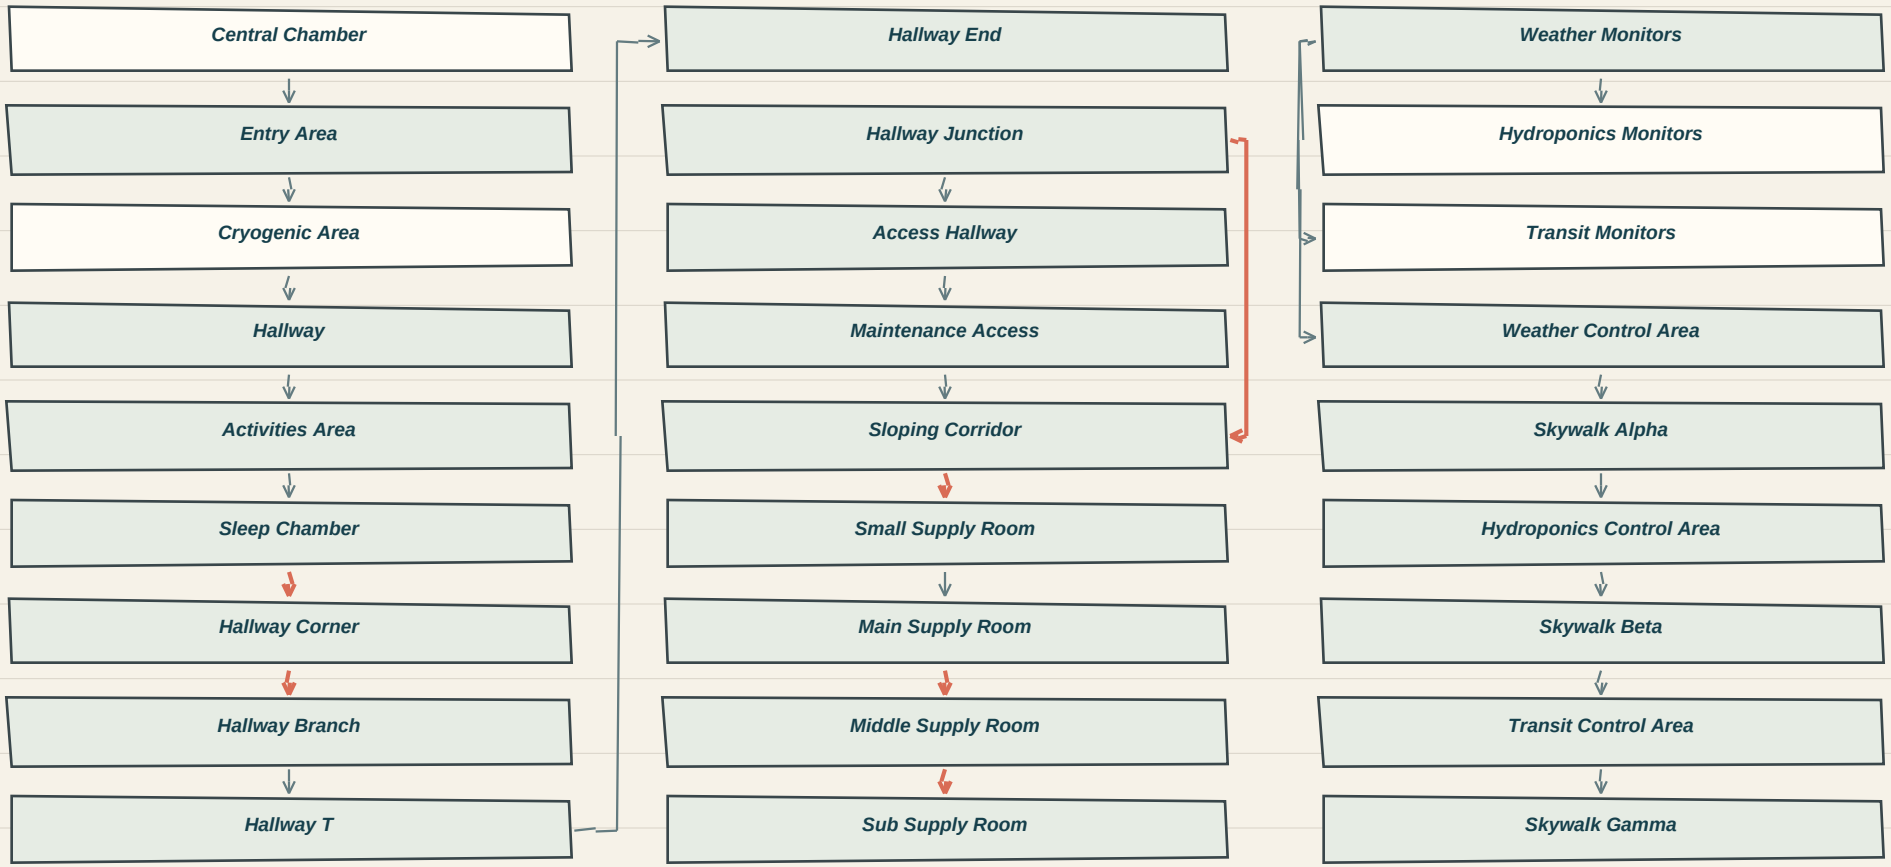
CABLES, CAMERA, AND RESET CODE

Commands 089-127; read down the left column, then down the right.

089 both waldo and sensa, move fred
090 waldo, cut cable with tool
091 get cable
092 go to iris
093 wait
094 wait
095 wait
096 wait
097 get cable from iris
098 go to primary channel
099 wait
100 wait
101 wait
102 wait
103 replace four-inch cable with twelve-inch cable
104 south
105 south
106 replace nine-inch cable with fourteen-inch cable
107 wait
108 poet, enter car
109 get out
110 north
111 west
112 get camera
113 east
114 south
115 enter car
116 get out
117 poet, go to primary channel
118 wait
119 wait
120 wait
121 wait
122 wait
123 plug camera into hole
124 point camera at sign
125 wait
126 iris, press fourth circle
127 press fifth circle

Service, Controls & Habitation

Hand-sketched schematic of all 63 named room objects, not to scale. Green rooms were reached on this route.



one crew, six very different sensors
