# THE HITCHHIKER'S GUIDE TO THE GALAXY

## Maximum-score walkthrough

A fresh-start route from Arthur's bedroom to the surface of Magrathea

VERIFIED FINISH

**400 / 400**

**518 moves | 429 commands | no game-over deaths**

840,675 executed instructions | seed 1003

68 opcode rows | Release 31 | Serial 871119

### How to play this route

Start a fresh Release 31 game with deterministic seed 1003. Enter each numbered command at the prompt. Repeated waits are intentional: they let the Vogon captain finish the poem, allow scene events to occur, and control the Improbability Drive's Dark exits.

The route covers Earth, the Vogon ship, the Heart of Gold, Traal, Damogran, the party, the War Chamber and Maze, and the sperm whale. Keep the towel for Traal; store equipment in the thing your aunt gave you when the load is heavy.

After the whale, retrieve the four fluffs and grow the plant in the sauna. Keep both tea and no tea for the screening door. The fruit reveals the correct tool: a pair of hypersonic pliers. Wear the gown and carry only the fish, no tea, and pliers into the Access Space.

### Score checkpoints

**10 pts**
Take the buffered tablet before leaving the bedroom.

**45 pts**
Arrive on the Vogon ship and get the Babel fish.

**85 pts**
Enjoy the poetry and type the second-verse password.

**135 pts**
Reach the Engine Room and recover the Traal interface.

**185 pts**
Complete Zaphod and Trillian scenes; Phil takes Trillian.

**200 pts**
As Ford, drink three beers and give satchel fluff to Arthur.

**225 pts**
Reach the Maze and remove common sense.

**250 pts**
Plant four fluffs and take the Tree of Foreknowledge fruit.

**350 pts**
Drink real tea while holding no tea.

**375 pts**
Open the screening door and enter Marvin's Pantry.

**400 pts**
Marvin repairs the hatch with the vision's hypersonic pliers.

ENDING VERIFIED

**At Ramp the story reports "Your score is 400 of a possible 400" and introduces the Magrathea landing. QUIT at the post-ending prompt; the replay halts after 429 commands.**

The guide includes hand-sketched maps for every story region and a trace-derived opcode inventory.

The particle shock is the scripted common-sense puzzle; it does not end the run or restart the player.
