A MIND FOREVER VOYAGING

Best-ending walkthrough | local Z4 release

A command-by-command route from PRISM's awakening to the Silver Dove

VERIFIED FINISH

The New Plan replaces Ryder's plan

1,080 commands | no numeric score

2,458,540 executed instructions | seed 1

78 opcode rows | Release 77 | Serial 850814

Before you start

Begin with the available local Z4 release (release 77, serial 850814); the requested Z3 file was not present. The route uses a fresh story, deterministic seed 1, and 2,458,540 executed instructions.

A Mind Forever Voyaging has no numeric score. This route records the needed future evidence, captures Senator Ryder threatening Perelman, disables Delta ventilation so the saboteurs are subdued, broadcasts the buffer, and reaches the New Plan ending.

Deaths and assaults in the 2051-2081 sections happen inside simulations. Perry is killed in some futures; PRISM survives in the real facility, stops Ryder, and completes the final 2091 simulation.

Outcome checkpoints

2071 EVIDENCE

Church pamphlet and public events move Perelman's report forward.

2081 EVIDENCE

Record the starving city, cemetery assault, bloody sack, and dog attack.

RYDER EXPOSED

Record Ryder threatening Perelman during the lockdown.

PLAN DEFEATED

WNN broadcast prompts the Guard recall and Perelman's victory message.

2091

Read the New Plan newspaper; complete the Silver Dove voyage.

ENDING VERIFIED

Perelman confirms that the broadcast exposed Ryder, the National Guard is recalled, and the Plan is dead in the water. The epilogue then allows the 2091 New Plan simulation; the route reads its newspaper and reaches the final voyage to the Silver Dove.

The requested Z3 file was not present locally; this route uses the available Z4 release.

Fatal events occur inside future simulations; PRISM survives the mission and completes the voyage.

Commands 0001-0042

Enter each numbered line at the current prompt. Single-letter entries dismiss story pauses.

The final voyage concludes; the game reaches its acknowledgements.

Rockvil: home, west side, and civic center

The early and mid-century route links Perry's apartment to the courthouse, university edge, and central square.

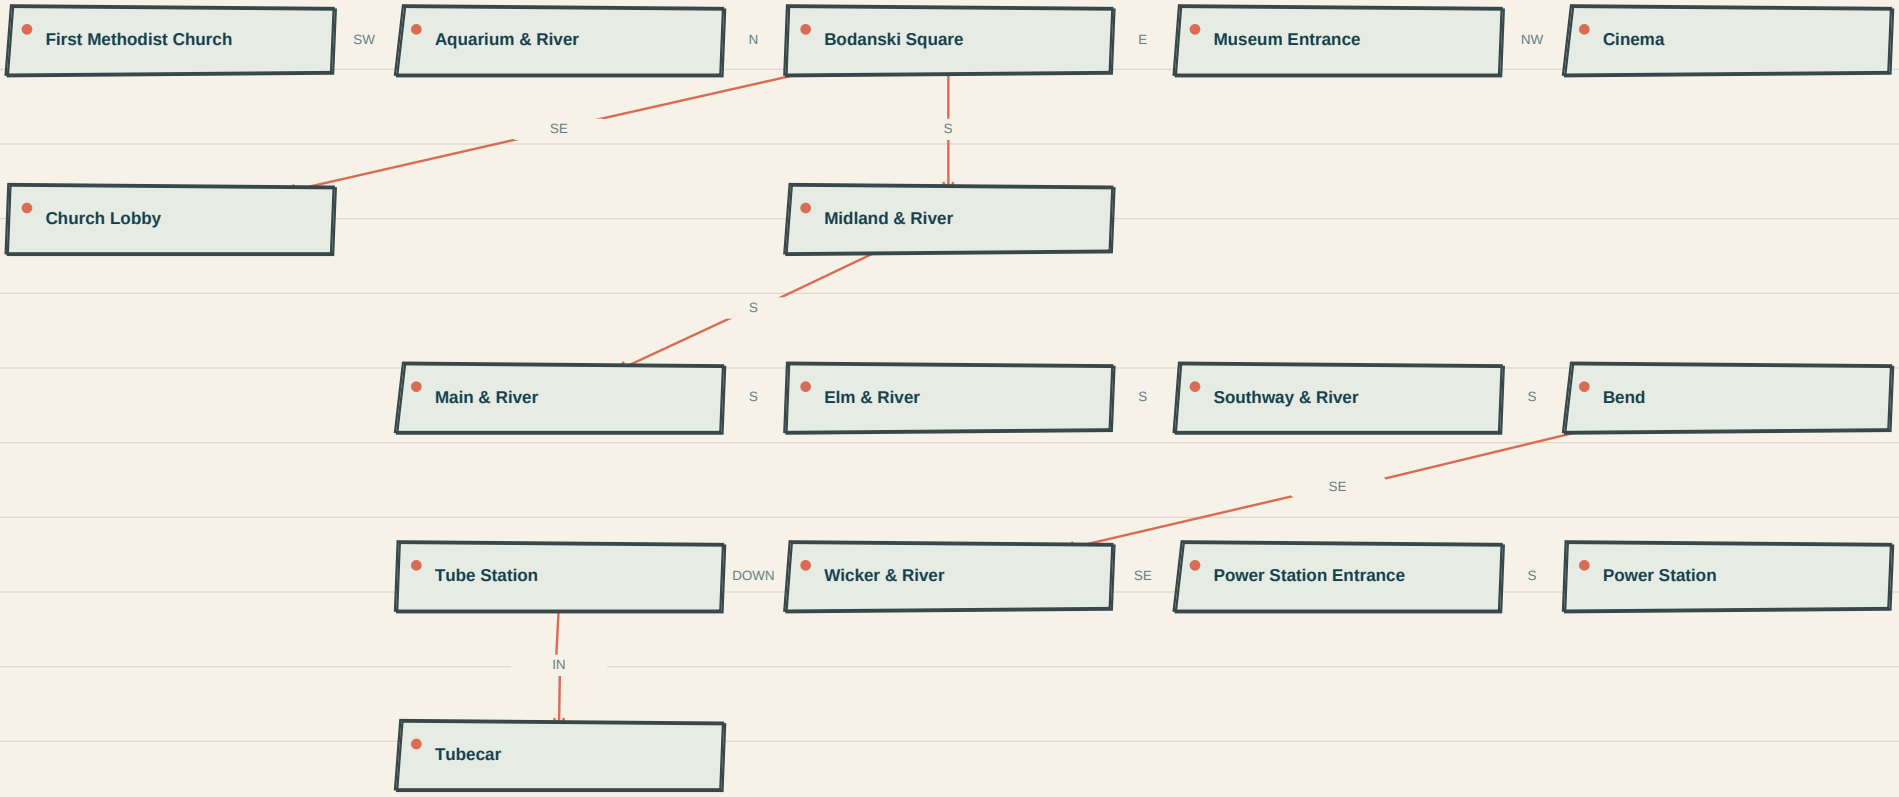

FIELD NOTES *Arrows mark route-verified links; the layout is a hand-sketched guide, not to scale.*

The first simulations share this street plan; raids, church notices, and public scenes change by decade.

The river corridor, industry, and underground

From Bodanski Square, the route follows the river south to the power station and down to the closed tube.

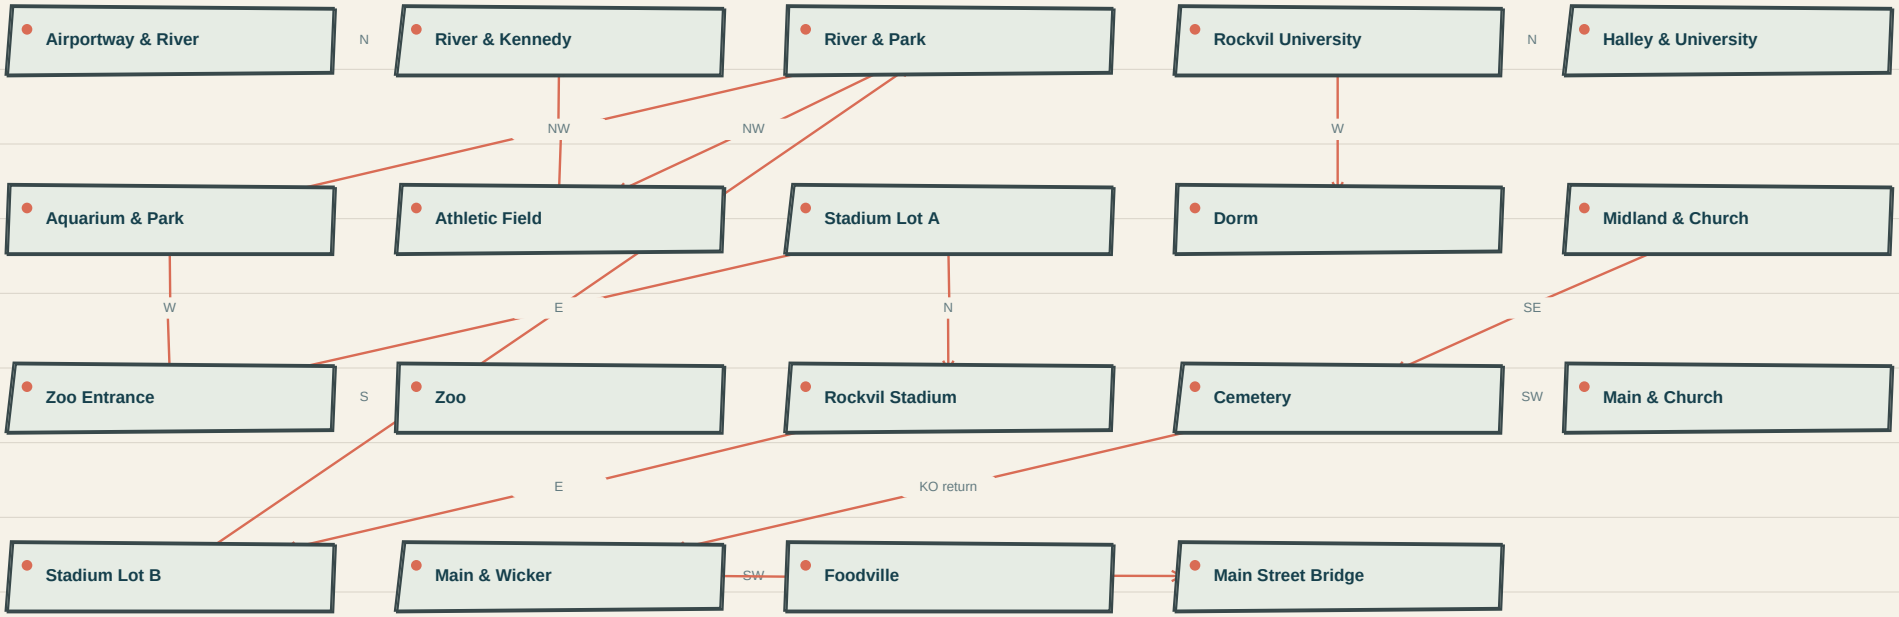

FIELD NOTES *Arrows mark route-verified links; the layout is a hand-sketched guide, not to scale.*

The tube becomes inaccessible in later simulations. The power-station edge is a recorded west-bank branch.

North Rockvil and the late-simulation ruins

Campus, zoo, stadium, cemetery, and the 2081 street where the final recording route ends.

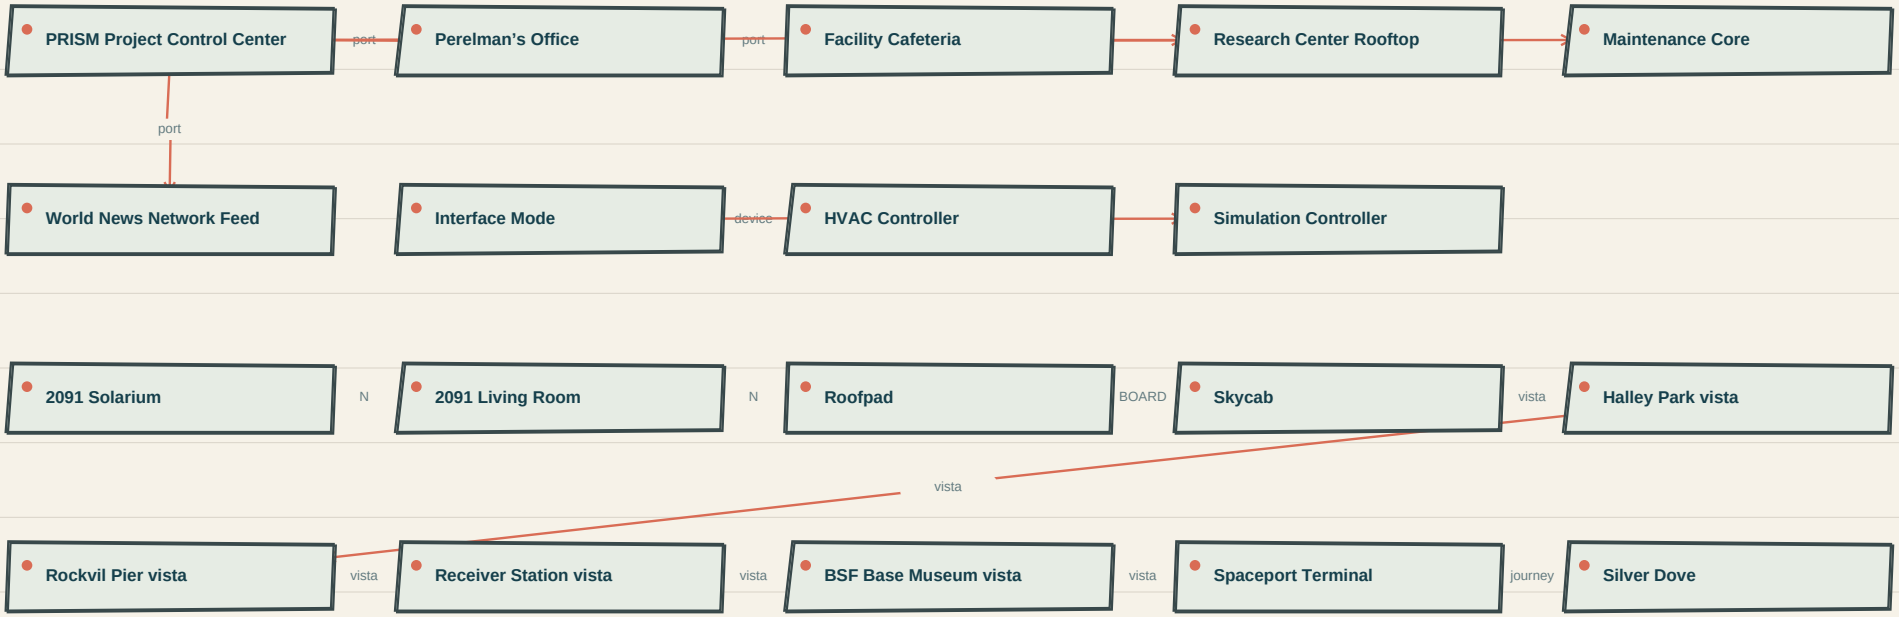

FIELD NOTES *Arrows mark route-verified links; the layout is a hand-sketched guide, not to scale.*

The cemetery assault returns Perry to Main & Wicker; the bridge dogs end that simulation, not PRISM's life.

PRISM control links and the 2091 voyage

Communications outlets, the sabotage controls, and the final New Plan scenes observed after the broadcast.

FIELD NOTES *Arrows mark route-verified links; the layout is a hand-sketched guide, not to scale.*

The last route reads the newspaper in the 2091 Living Room, then follows the family's voyage to the Silver Dove.

Opcode table 1 of 5

Rows use the executed instruction's form and are ordered by first appearance in the successful replay.

TOTAL INSTRUCTIONS 2,458,540 — 78 unique form/opcode/mnemonic combinations
