SPELLBREAKER

Maximum-score victory walkthrough

A seed-1 route through the cubes to the Scientist ending

VERIFIED FINISH

600 / 600

348 commands | 455 moves | no player deaths

917,003 executed instructions | seed 1

57 opcode rows | Release 87 | Serial 860904

Before you start

This fresh Z3 route uses seed 1 and reaches the story's stated 600-point maximum. It escapes the alarm in the Outer Vault, rescues Belboz's key, and replaces the shadow's magic cube with the sack.

Learn spells only when prompted. The simulated transformations are temporary. At the grouper nest, wait until you become yourself again before taking the loose items; the vault's correct cube is seed-dependent.

The route ends after the Scientist ending by answering QUIT. It records 348 commands and 455 moves with no player-death message.

Score checkpoints

EARTH + SOFT

105 points after the Soft cube; Caskly and Throck are recorded.

WATER + AIR

185 points after the Air cube; obtain the opal eye and blue carpet.

THE DARK CUBE

390 points after the brown rock's cube; rest before learning Blorple.

THE VAULT

490 points after escaping with cube x7; 525 after preparing the cabinet.

THE MAGIC CUBE

550 points after retrieving it from the sack; the finale raises score to 600.

SCIENTIST

600/600 at 455 moves; shadow destroyed; no player death.

ENDING VERIFIED

The shadow is destroyed, magic ends, and Belboz confirms the new age in Belwit Square. Score: 600/600; no player death.

The four hand-sketched maps cover all 58 locations found on this route; spacing is schematic.

The vault puzzle follows deterministic seed 1; the conclusion confirms a 600-point Scientist ending with no death.

The route to end magic

Commands 001-050; read down the left column, then down the right.

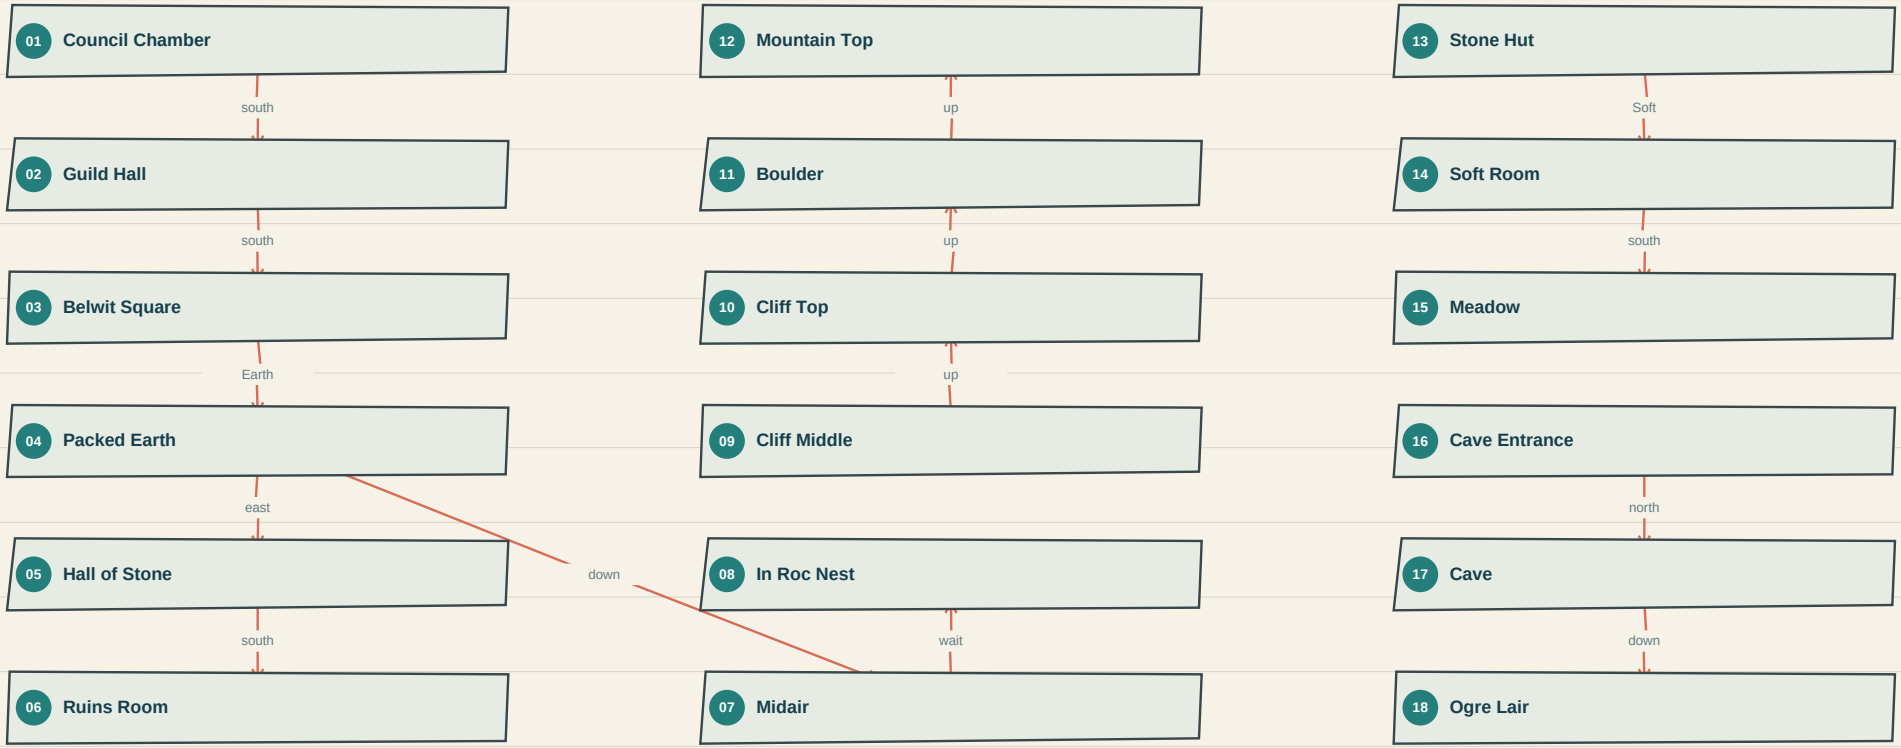
The Guild, Earth and the cliffs

18 rooms; four map sheets cover all 58 locations reached by the route.



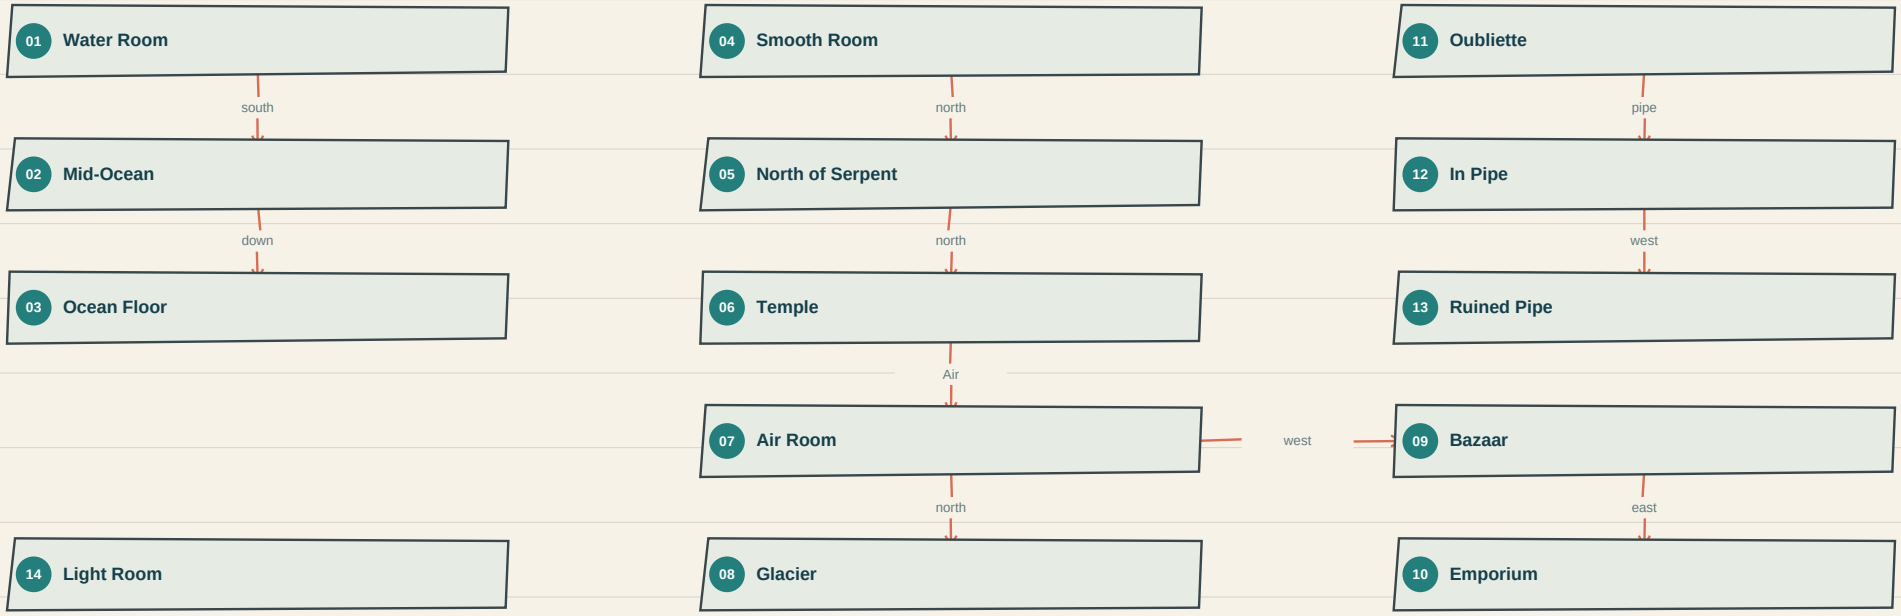
first cubes, cliffs, and the ogre cave; the Earth cube links back to the cave route

MAP KEY Coral arrows show observed command travel. Room order and spacing are schematic field notes.

Arrows show first-arrival travel; reverse trips and loopbacks are omitted for legibility.

The water, serpent and air routes

14 rooms; four map sheets cover all 58 locations reached by the route.



Water Room opens north to Oubliette; distant lands connect by Blorple

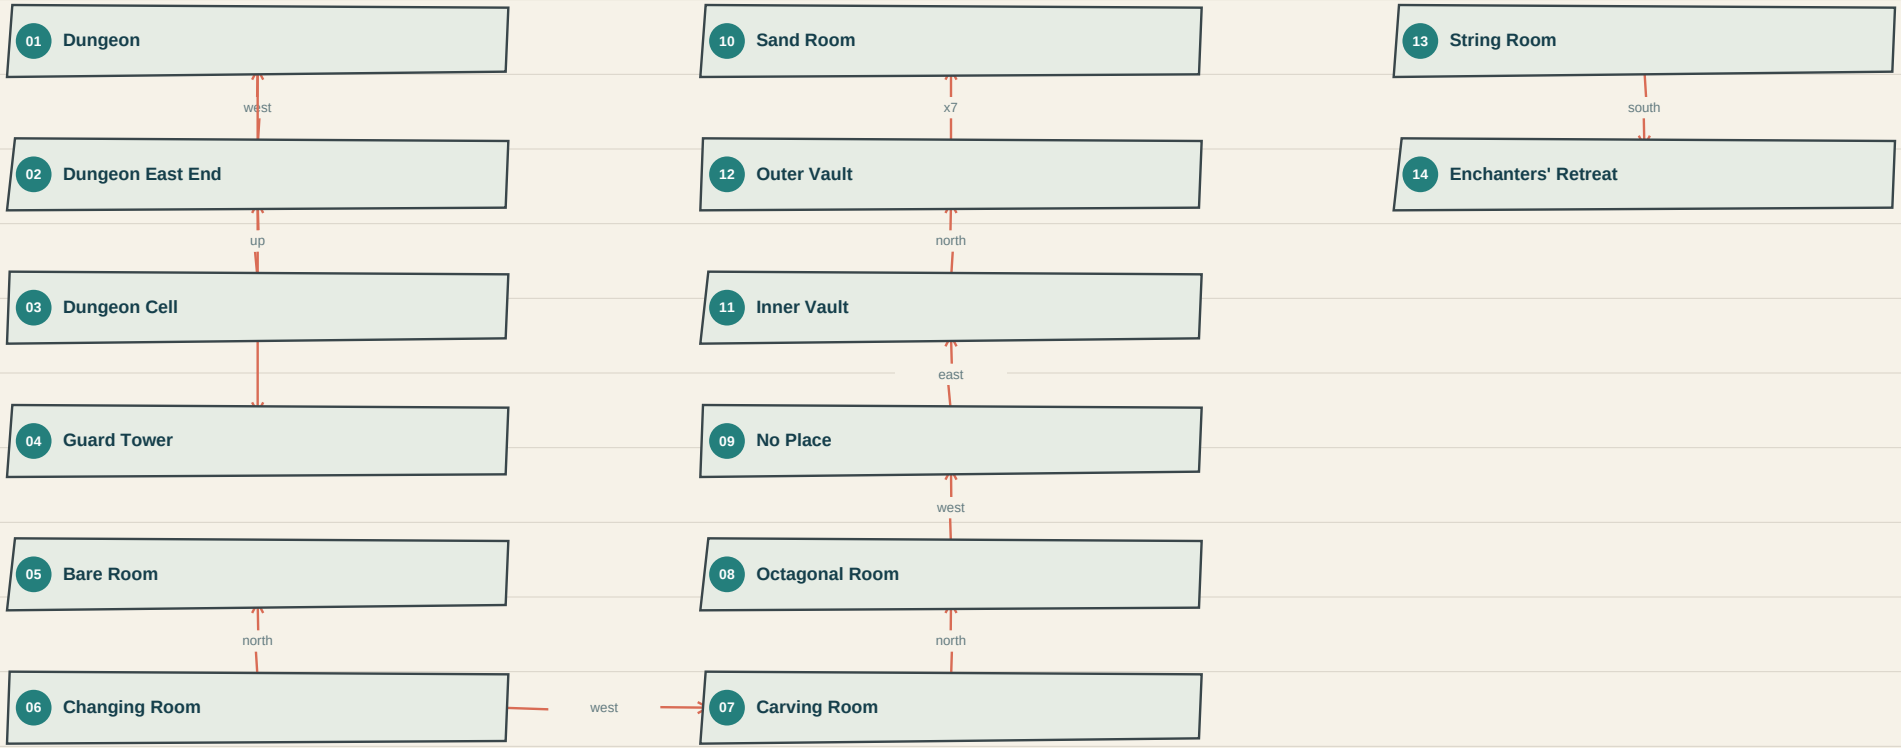
Cross-sheet route: Oubliette → Dungeon (up)

MAP KEY Coral arrows show observed command travel. Room order and spacing are schematic field notes.

Arrows show first-arrival travel; reverse trips and loopbacks are omitted for legibility.

Change, the vault and the Sand Room

14 rooms; four map sheets cover all 58 locations reached by the route.



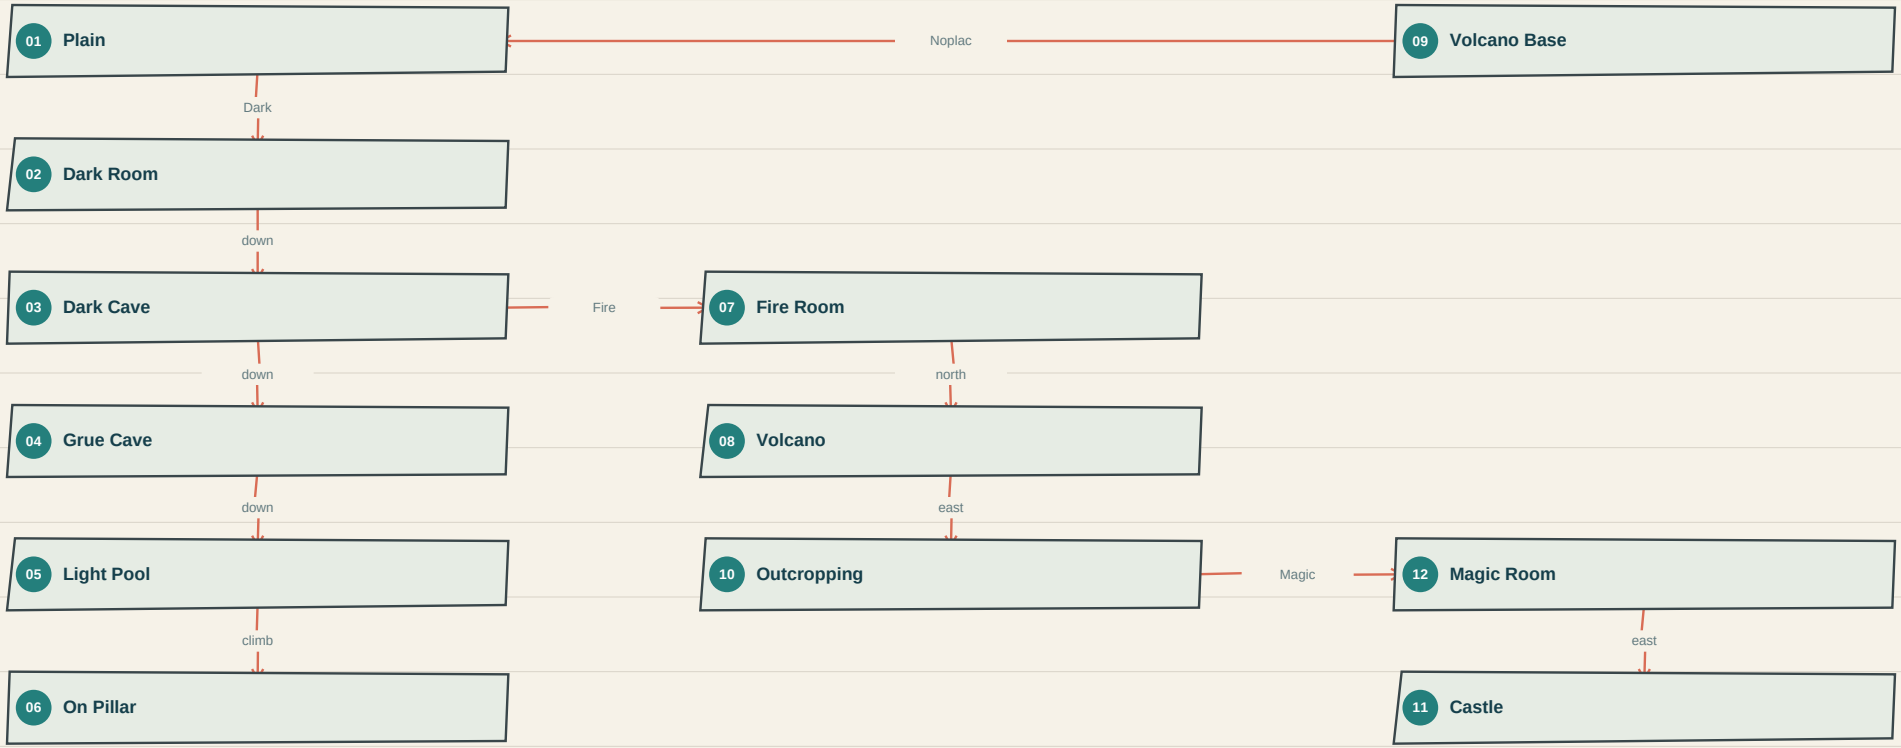
the carved maze, hidden vault, Sand Room, dungeon, and Enchanters' Retreat

Cross-sheet route: In Roc Nest → Changing Room (Change); Outcropping → String Room (String)

MAP KEY Coral arrows show observed command travel. Room order and spacing are schematic field notes. Arrows show first-arrival travel; reverse trips and loopbacks are omitted for legibility.

The Plain, darkness, and the ending

12 rooms; four map sheets cover all 58 locations reached by the route.



the Plain's moving rocks, dark maze, fire land, and the final throne room

Cross-sheet route: Light Room → Volcano Base (west)

MAP KEY Coral arrows show observed command travel. Room order and spacing are schematic field notes.

Arrows show first-arrival travel; reverse trips and loopbacks are omitted for legibility.

Opcode table 1 of 3

Rows are grouped by actual instruction form and ordered by first appearance.

57 unique form/opcode/mnemonic rows **917,003 total instructions executed**

First Seq is one-based execution order; First PC is the first address in hexadecimal.
